

HeliCoil® Aftermarket Products Sav-A-Thread® M16 x 1.5 3 Valve Head Spark Plug Thread Repair

The M16 x 1.5 HeliCoil® Sav-A-Thread® kit is a professional spark plug thread repair kit that is typically used in 4.6 and 5.4 liter 3 VALVE Ford® Triton® engines from 2004 to 2008. The Sav-A-Thread® products offer the highest quality and most durable repair available to permanently restore stripped spark plug hole threads.

Given the increased complexity of automotive design and the need for quick, easy, on-the-spot repairs, Sav-A-Thread is a must for every store and shop.

It is recommended that the head be removed before installation to ensure chips do not enter the cylinder.

HeliCoil® is the original innovator of spark plug port repair.

This Sav-A-Thread Kit contains:

- Piloted Reamer Tap (1)
- Steel Installation Tool (1)
- Expanding Tool (1)
- Inserts (12)

Order Part Number 5396-16.

FEATURES & BENEFITS:

- Designed for Ford® Triton® 4.6 and 5.4 liter 3 valve engine spark plug applications
- For repair on ports containing Autolite® HT and Motorcraft® Platinum PZT™ Spark plugs
- Specialty tooling allows for easy access to deep ports
- Positive mechanical locking feature ensures insert stability
- Unique piloted reamer tap design allows for perfect alignment and depth control
- Pre-drilling is not required

New Insert Design
