Camcar® Socket Screws

Superior Socket Screw Products

STANLEY Engineered Fastening is committed to offering a broad range of socket screw standard products made in the USA.

STANLEY Engineered Fastening takes pride in designing, producing and delivering superior products – an attitude you would expect from the industry's leading innovator.

That pride, combined with the latest fastener technology and engineering expertise, makes STANLEY Engineered Fastening one of the most reliable sources of Socket Screw products in the industry today.

- Inch and metric sizes
- Hex and TORX PLUS® Drive available
- Heat-treated alloy steel
- Meet ANSI and ASTM standards
- Cold formed product
 - Provides uninterrupted grain flow for increased fatigue strength
 - Causes material to work-harden for improved yield and ultimate tensile strength
- Roll formed threads
 - Stronger threads
 - Efficient and economical fastener production
 - Increased joint and product integrity

A wide variety of these high strength fasteners are in-stock, ready to meet your fastening needs. Single source supply can provide lower costs and improve quality.

Also, we can supply you with innovative socket screw specials or socket screw products for high-temperature or corrosive environments. Any products not shown in this handbook may be considered specials. Please contact the application engineers at Decorah Operations at 800-648-0642 for design assistance or further information.

Sales Service Team

Each customer is assigned to a sales service team. Team members are up-to-date on customer activity and can provide quick and accurate responses to inquiries regarding order status, shipping schedules, quotes and more.

Distributors Located Around the World

The Camcar socket screw product line is readily available through our network of distributors. To find a distributor near you, please contact us at 800-648-0642.

Commitment to Quality

All Camcar socket screws are made from carefully selected and analyzed raw material, and critically inspected during the manufacturing processes.

- Utilize both Statistical Process Control and Quality at the Source methods
- Each manufacturing lot is assigned an identification number to give you complete traceability of quality in the finished product
- Many Camcar socket screw products are marked with the "Camcar" name for further assurances of the manufacturing source
- Fastener testing facility
- Integrated QA system
- Applications testing
- IATF 16949:2016

Founded on Innovation and Technical Expertise

The Camcar brand began in 1943, cold forming a component others said "couldn't be made". From that manufacturing innovation – the Raycarl® cold forming process – to the TORX PLUS® Drive System

and other leading-edge products, the Camcar name has become synonymous with outstanding fastening solutions.

Camcar® Socket Screws

Ordering Information

For the purposes of electronic data processing, stock numbers are assigned to all items in the Camcar socket screw product line. These numbers are shown in each price list in this catalog. STANLEY Engineered Fastening maintains a minimum order of \$275.

For price quotations on either stocked items or specials, contact the Decorah Operations Customer Service Department. Lead times from these quotations can be verified at the time of the order. All quotes are subject to review of the complete and clear print.

Packaged Camcar Socket Screws

As part of our ongoing efforts to improve our socket screw product line, we offer bar coded, safety-sealed packages. This not only ensures the package has not been tampered with, but also provides needed product information in an easy to read format. The information on the label includes lot number for traceability, part description, item number and a bar code for easier receiving.

Stock numbers

For the purposes of electronic data-processing (EDP), STANLEY Engineered Fastening has assigned stock numbers to all the items in this price list. For inch sizes, hex recess EDP numbers begin with a "1"; TORX PLUS® recess EDP stock numbers begin with a "3".

The NIDA-SIDA manufacturer's code number assigned to STANLEY Engineered Fastening is 697264.

Socket screw products described in this catalog are manufactured from the highest quality alloy and stainless steels in strict conformance with standards and dimensions as set forth in ANSI B 18.3 - 1986; ANSI B 18.8.2 - 1978; MS16555 - 1985; and ANSI B 2.2 - 1968. Camcar socket products meet the respective ASTM Standard Specifications required in ANSI B18.3.

Special products

Products not listed in this schedule are special and will be priced upon request. Blueprints must accompany your request for quotation.

Special materials

Products manufactured from metals other than indicated in this price schedule are specials and priced on request.

Product weights

Weight of products listed in this schedule are approximate pounds per box.

Returned goods

No products accepted for return without written authorization prior to return. Returns will be subject to a restock fee and other guidelines to be determined at time of request.

Price quotations

Quotations valid for 30 days from date of issue.

Plating

Products which are not plated by STANLEY Engineered Fastening are not guaranteed and are not subject to return. STANLEY Engineered Fastening will only plate those thread designations (i.e. 2A) which provide for plating allowance.

Minimum order charge

Orders will not be accepted for less than \$275.

STANLEY Engineered Fastening shall not be responsible or liable for misapplication or misuse of this product. All warranties are void if the product is plated or modified in any manner not under the control of STANLEY Engineered Fastening.

Drive System Selection

Drive System Availability

STANLEY Engineered Fastening is committed to offering the marketplace the latest in fastening solutions. As such, many of our most popular socket screw products are available with both the TORX PLUS® Drive System and hex drive system.

Drive System Selection

There are several issues impacting proper socket screw drive system selection which must be reviewed prior to specification. Among the questions requiring review are:

- Does the drive system's torque capabilities meet the requirements of my application?
- Will the drive system withstand the high torque levels used in fastening socket screws?
- Is the required tooling readily available?
- Will I need separate tooling for inch and metric screws?
- Will the drive system enhance my overall operations?

In order to answer these questions, it is important to compare the available drive systems.

Introduction to the TORX PLUS® Drive System

Developed as an improvement of the original TORX® Drive System, the TORX PLUS Drive consistently outperforms hex and other commonly-used drive systems. Used in virtually every industrialized nation in a multitude of industries, the TORX PLUS Drive System can enhance product reliability, increase productivity, and reduce total assembly costs. The TORX PLUS Drive System offers a 100% improvement in driver bit fatigue life and a 25% average improvement in driver bit torsional strength. In addition, its unique design provides optimum torque transfer and eliminates the need for excessive end load pressure while driving the fastener. The TORX PLUS configuration also virtually eliminates tool camout and slippage that can damage the head of the fastener and cause reduced tool life.

TORX PLUS® Drive System vs. Hex Drive

The hex drive has weaknesses inherent in its design which can cause problems during assembly. The engagement of the hex drive tool to the recess produces highly concentrated stress at the six corners of the drive tool (see below).

This stress at the thin cross-sectional areas of the fastener crushes the corners of the hex tool. This reduces the amount of wrenching engagement, causing reamed socket recesses and/or damaged socket tooling. This type of failure with the hex drive system is so common, it is often accepted as normal practice.

The TORX PLUS Drive System features deep engaging lobes with broad contact surfaces that spread out driving forces, preventing stress risers from forming. This minimizes damage to the drive tool and fastener, resulting in longer tool life. Customers have reported driving 2 to 10 times more fasteners per drive tool after switching to the TORX PLUS Drive.

TORX PLUS® Drive Tooling Availability

TORX PLUS Drive tools are readily available throughout the world from licensed manufacturers and authorized distributors. Your existing tooling suppliers often also carry TORX PLUS Drive tools, in many standard styles and sizes to meet your installation requirements.

For service in the field, TORX PLUS Drive fasteners can be removed and reinstalled using commonly available TORX PLUS Drive or TORX Drive tooling. However, in order to fully realize the benefits of the TORX PLUS Drive, including extended bit life, TORX PLUS Drive tools should be used.

Camcar® Socket Head Shoulder Screws

Inch Sizes

Product Description

- Heat-treated alloy steel
- Class 3A thread fit standard

Pricing Notes

- Net price per 100
- Bulk pricing upon request

Camcar® Flanged Button Head Cap Screws

Inch Sizes

Product Description

- Heat-treated alloy steel
- Fully threaded
- Large bearing surface

Pricing Notes

- Net price per 100 available in listed thread series only
- Bulk pricing upon request

WARRANTY

STANLEY Engineered Fastening makes no warranty, express or implied, except that goods sold by description, sample or model shall substantially conform to the description, sample or model, and in such case, the responsibility of STANLEY Engineered Fastening shall be limited to the replacement of nonconforming goods returned to STANLEY Engineered Fastening within one month after delivery to Buyer (f.o.b. at point of delivery to carrier), provided that such goods have been solely used for the purpose for which manufactured. All replaced goods are to be returned to STANLEY Engineered Fastening after receiving authorization from STANLEY Engineered Fastening. This warranty does not apply when any physical or chemical change in the form of the product is made by the Buyer or any other party. There are no warranties which extend beyond the description stated herein. STANLEY Engineered Fastening shall not otherwise be liable for any costs or expenses incurred in the replacement of any defective or nonconforming products and in no event shall STANLEY Engineered Fastening be liable for incidental or consequential damages.

The foregoing warranty and such other warranties made by STANLEY Engineered Fastening, as are expressly stated herein, are specifically in lieu of any other warranties, express or implied, including the implied warranties of merchantability and fitness for a particular purpose.

The selection of this product for a particular application or use is the responsibility of the customer. The applications engineers at Decorah Operations are available to assist customers in selecting the appropriate product for a particular application or use. All warranties are void if the product is plated or modified in any manner by any person other than STANLEY Engineered Fastening.

STANLEY Engineered Fastening has strived for total accuracy throughout this catalog.

However, STANLEY Engineered Fastening shall not be liable or responsible for any typographical errors that may occur. If any questions arise as to the accuracy within this catalog, please contact the applications engineers at Decorah Operations.

Powerful Brands. Breakthrough Solutions.

At STANLEY Engineered Fastening we believe in seeking ways to serve our customers better. We create the future by anticipating our customers needs. Through diversifying our product lines, creating unique assembly technologies and offering a breadth of service to meet the demands of industry worldwide, STANLEY Engineered Fastening provides technological solutions to over 100 different industries.

Avdel®

Avdel has been producing assembly systems since 1936 and offers a comprehensive range of fasteners and tooling.

POP®

From 2mm micro rivets to 1/4" structural rivets, POP blind rivets meet the needs of multiple markets.

Dodge®

With a focus on high-quality threaded inserts for plastics products, Dodge has been a leader in the fastening market since the 1950s.

Spirallock®

Spirallock is a technologically superior fastening system ideally suited for threaded joint applications subjected to heavy shock and vibration.

Gripco®

Gripco has been providing quality nut and threaded assembled products since 1904.

STANLEY Assembly Technologies

STANLEY Assembly Technologies supplies production solutions to the global assembly market.

Heli-Coil®

Based on a long history that began in the aerospace industry, Heli-Coil offers a vast range of high-quality thread inserts. Heli-Coil products available through Authorized Distributors or Licensed Global Partners.

Tucker®

A one-sided drawn-arc welding process is the foundation of the Tucker No-Hole assembly solution.

iForm®

iForm continues a proud heritage since 1969 and represents over 40 years of creative threaded fastener application engineering.

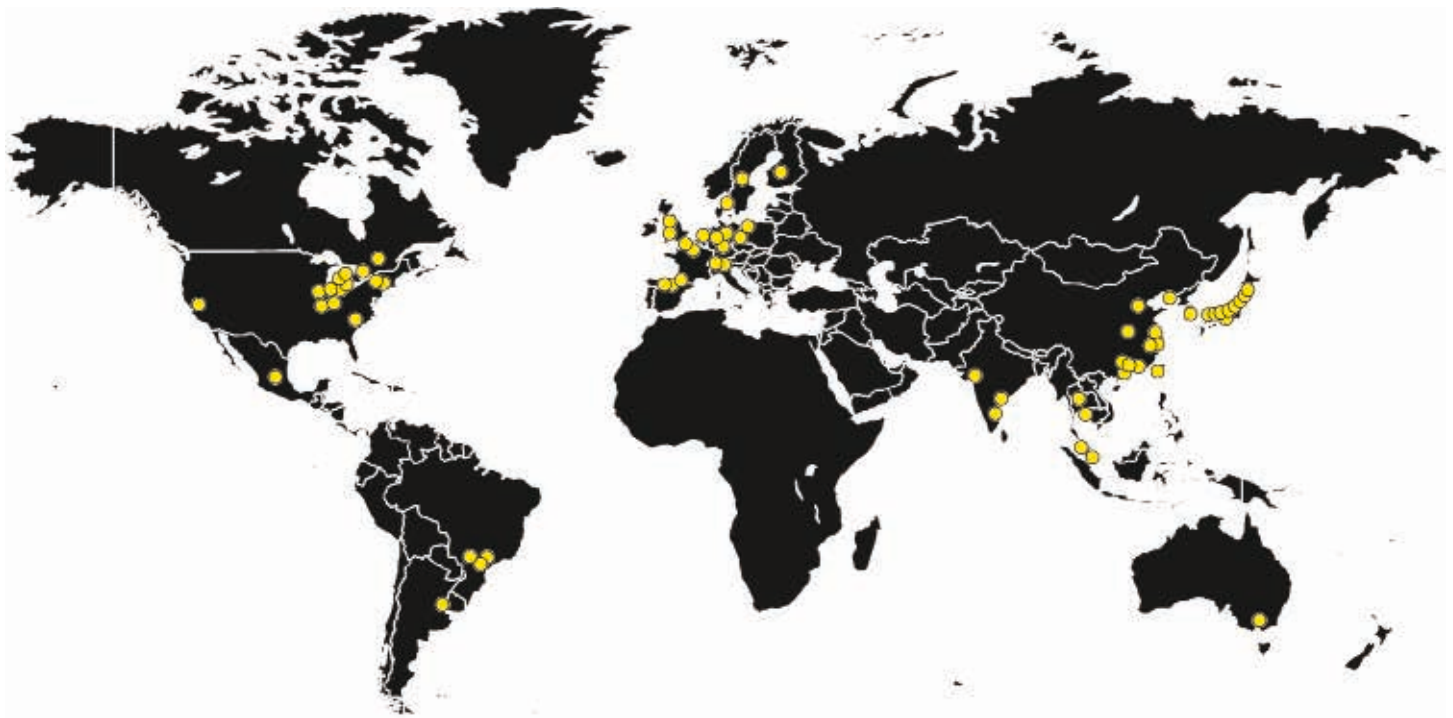

Warren®

Whether it's plastic, metal, or a combination of the two, Warren can design a product that will suit your environment.

STANLEY®

Engineered Fastening

STANLEY Engineered Fastening, a Stanley Black & Decker Inc. Company has been revolutionizing fastening and assembly technologies for a variety of industries for more than 40 years.
